Logic Overview

Logic Solutions, Inc. is a global company that specializes in:

Website and Web Application Development
China IT Staffing
China Sourcing

Website and Web Application Development

Logic is a full-service website and web application development company. From a web site facelift to complex applications that efficiently interact with existing IT applications, we provide solutions based on our twelve years of experience.

- ◆ Our Technical team builds clean, standards-compliant, cross-browser applications.
- ◆ Our Content team develops a user experience that is engaging, search engine-friendly and easy to use.
- ◆ Our Creative team brings your concept to life with the use of compelling imagery, graphics design and color.
- ◆ Our Project Management team manages resources and schedules in order to complete projects within scope, and to achieve quality, time and cost goals.

Our clients choose us because they want to work with people who can hear what they want to accomplish and offer creative ways to achieve results. Marketing directors come to us for a fast, reliable, business-like way of revamping their existing web site. IT directors call us for our technology expertise and for the focus of a dedicated team that can get a mission critical project up and working, on time and on budget.

China IT Staffing

With headquarters in Ann Arbor, Michigan, and offices in Shanghai, Beijing and Nanjing, China, Logic offers U.S. companies a cost effective way to support both their domestic and international operations. With savings typically in the 50% range, China staffing represents a significant way to augment your IT staff with an immediate ROI.

Logic performs China based software development, graphic design, BPO and IT support. Utilizing our experiences, Logic Solutions can provide these services immediately:

- ◆ Application developers
- ◆ Web site developers
- ◆ Art and Graphic designers
- ◆ IT support staffing 24 X 7
- ◆ On site Asian staffing
- ◆ BPO-Call Center

For IT staffing, Logic offers two basic business models that enable you to control and manage your results and expenses.

Model I: Logic Management of China IT Resources

This model provides you with a U.S. based technical contact that is typically multi-cultural. The Technical Lead will manage the interface between your requirements and the international team. This expertise guarantees that key business rules and local standards are appropriately incorporated into the finished product.

Model II: Client Management of China IT Resources

This model provides you with direct management of the offshore personnel. A key part of your Chinese team will be a technical lead that speaks and understands English. Your projects will be implemented adhering to U.S. or Asian standards, as appropriate.

China is emerging as a key source of highly skilled IT and support personnel at internationally competitive rates. Our Chinese resources represent a highly talented stable work force focused on client satisfaction. With flexible business models, existing offices, proven experience and a highly skilled work force, Logic Solutions enables you to rapidly deploy international based services with success.

China Sourcing

Small and Medium-sized Enterprises must find an effective way to optimize their product costs by using the resources of the global market without sacrificing quality. For many, the most cost-efficient, high-quality producers are now located in China.

Successful China sourcing requires a partner with:

- ◆ China sourcing experience
- ◆ Credibility through proven performance
- ◆ Experience in supply chain management
- ◆ Offices in both countries staffed by teams from both cultures
- ◆ Excellent written and verbal skills in both languages

Logic Sourcing specializes in finding, qualifying and establishing preferred vendor sources. Logic Sourcing has extensive experience in meeting the requirements of this specialized market. Our combination of U. S. corporate headquarters, multi-cultural, bi-lingual employees, China offices and twelve years of business experience will provide you with a satisfying, profitable experience in using international sources for your products.
